

Incoming Second grade Summer Math Project

This math packet is due on the first day of school. I encourage you to work on it daily, a little at a time. The idea is to keep the important math facts your child learned during First grade fresh in their brains.

In addition to this packet, ABC mouse has great math practice games. Also, look for math fact apps in your app store!

Have a great summer!!!

The teacher will read the following problems to the student and they will answer orally. The teacher can place a check mark on the line if the student answers correctly. {Students should be able to answer these using the commutative property.}

1. If $7+3=10$, what is $3+7$? _____

2. If $5+8=13$, what is $8+5$? _____

3. If $4+10=14$, what is $10+4$? _____

4. If $2+9=11$, what is $9+2$? _____

For the following questions, students will solve the first problem, then tell you the new problem when the numbers are switched using the commutative property.

1. $1+3=$ _____ Now flip the numbers: _____

2. $7+6=$ _____ Now flip the numbers: _____

3. $10+2=$ _____ Now flip the numbers: _____

Six families are worried! All the rafts are full of fact families. But a family member has fallen out of each raft.

Look at the problems on the side of each raft.

Decide what number is missing from both problems.

Draw a line from each raft to its lost family member.
